

## Academic Standards

Effective immediately, the departmental policy on academic standards in Management courses shall be as follows:

Students are expected to maintain at least a B (3.00) average in all graduate courses taken in the Management Department. Maintenance of good academic standing in the Management Ph.D. Program requires that this standard be met at all times. Whenever a student fails to meet this standard, his or her academic performance will be reviewed by the Management Ph.D. Program Faculty Committee to determine whether the student shall be permitted to remain in the Management Ph.D. Program.

Note that this policy and language mirror that of the Graduate School's policy on academic standards, except that the Graduate School's policy applies to performance in all courses taken.
